PRODUCT SHEET

Veeva Quality

Veeva Quality brings together QA, QC, food safety and training on a single cloud platform to enable efficient quality management.

Quality applications exist on a single validated platform, allowing for the consolidation of quality processes that have been traditionally managed in siloed, disparate systems.

Veeva QualityDocs is the industry-leading application for GxP quality and non-GxP quality content management application.

Veeva Station Manager is a simple tablet-based application that ensures the right content is available 24/7 for operators on the manufacturing floor.

Veeva QMS manages and tracks quality and food safety processes such as deviations, complaints, CAPAs, change controls, supplier quality records, audits, and risk management.

Veeva Food Safety streamlines HACCP management, eases compliance, improves visibility and control over critical risks.

Veeva Batch Release aggregates data and content from QMS, LIMS, ERP, and regulatory systems to facilitate GMP release and market-ship decisions.

Veeva Training is a GxP and non-GxP optimized learning management system (LMS) that manages authoring, approval, assignment, and assessment of training materials in one place.

Veeva LearnGxP is an eLearning library of accredited courses and microlearning videos to help organizations meet regulatory requirements and drive personnel development.

Veeva LIMS is a laboratory information management system that facilitates quality control activities for manufacturing.

PRODUCT	ANNOUNCED	STATUS	CUSTOMERS
Veeva QualityDocs	2013	Very Mature	100+
Veeva Station Manager	2018	Mature	11–50
Veeva QMS	2016	Very Mature	100+
Veeva Food Safety	2023	Early	1–10
Veeva Batch Release	2023	Early	1–10
Veeva Training	2018	Mature	100+
Veeva LearnGxP	2016	Mature	100+
Veeva LIMS	2021	Early	1–10

PRODUCT SHEET

Veeva QualityDocs

QualityDocs is a quality content management solution. It is based on Veeva's proprietary GxP content reference model which enables best practices and standardization. The application manages content throughout its entire lifecycle, from creation to disposal. It allows internal and external parties to collaborate and share information, such as quality agreements and batch-related documentation, in a controlled manner directly within the system.

Announced	2013
Status	Very Mature
Customer type	Enterprise FMCG, F&B, Pharma, Biotech, Chem, CM, CRO, CDMO, MedTech
Customers	100+
Platform	Veeva Vault
Integrations	Lives with Training, QMS, LIMS, Station Manager

PRODUCT SHEET

Veeva Station Manager

Station Manager is a tablet-based application that provides manufacturing operators access to content from QualityDocs. As a foundational element of business continuity planning, Station Manager syncs with QualityDocs when internet connectivity is available to ensure the latest versions of content are accessible even when offline. Station Manager surfaces only the relevant work instructions and procedures for a specific station in manufacturing to ensure operators readily have access to the content they need.

Announced	2018
Status	Mature
Customer type	Enterprise FMCG, F&B, Pharma, Biotech, CDMO, MedTech
Customers	11–50
Platform	Veeva Vault
Integrations	Requires QualityDocs

PRODUCT SHEET

Veeva QMS

QMS is a system designed to manage quality processes for highly regulated industries. It provides best practices for handling complaints, deviations, audits, and change control. It also allows external partners to access the system to collaborate on investigations, audit findings, and corrective actions.

QMS is unified with other Quality Suite applications and connected to Registrations to enable coordination of product change control activities. Additionally, QMS, Batch Release and LIMS bring together quality assurance and quality control processes in one platform.

Announced	2016
Status	Very Mature
Customer type	Enterprise Pharma, Biotech, CRO, CDMO, MedTech
Customers	100+
Platform	Veeva Vault
Integrations	Lives with QualityDocs, Training, LIMS, Batch Release

PRODUCT SHEET

Veeva Food Safety

Veeva's Food Safety solution empowers food and beverage companies to modernize HACCP plan management at scale. Built with the industry's unique challenges in mind, this solution integrates critical food safety processes, making it easier to create, manage, and standardize HACCP studies across facilities and geographies.

Announced	2023
Status	Early
Customer type	Food & Beverage, Ingredients
Customers	1–10
Platform	Veeva Vault
Integrations	Requires QMS Lives with QualityDocs, Training, QMS, LIMS

PRODUCT SHEET

Veeva Batch Release

Batch Release is an end-to-end solution that automates aggregation, reviews, and traceability of batch-related data and content to enable faster, more confident GMP release and market-ship decisions.

Batch Release brings together data and content from QMS, LIMS, ERP, Veeva RIM and Regulatory Systems to simplify collaboration and decision making.

It is tightly integrated with and requires QMS and QualityDocs. When used with LIMS and RIM, it offers faster time to value, but can be implemented with third party solutions and adjacent paper processes.

Announced	2023
Status	Early
Customer type	Enterprise Pharma, Biotech, CDMO
Customers	1–10
Platform	Veeva Vault
Integrations	Requires QMS and QualityDocs Lives with QMS, QualityDocs, LIMS Connected with Registrations

PRODUCT SHEET

Veeva Training

Training is a learning management system (LMS) designed for GxP and non GxP-compliance. It gives customers tools to manage learning content and curricula, and to deliver and track assignments. Training administrators can build curricula with many training types, including documents, videos, eLearning, classroom training, on-the-job training, assessments and more. Managers can track qualification and compliance status using reports and dashboards.

Training is unified with QualityDocs, ensuring access to source content and automating re-training based on changes. Document and training data are easily combined for reporting, and training assignments can be made in QMS workflows.

Customers	100+
Platform	Veeva Vault
Integrations	Requires QualityDocs Lives with QualityDocs, QMS, LIMS Connected with LearnGxP

PRODUCT SHEET

Veeva LearnGxP

LearnGxP is an accredited training library that can be deployed with Veeva Training or other learning management systems. The library contains interactive eLearning content and microlearning videos on topics such as the Fundamentals of Good Manufacturing Practices, Data Integrity, and Inspection Readiness. It is designed to help regulated companies meet GxP compliance requirements and provide professional development on industry-specific topics to their workforce.

Announced	2016 (acquired in 2021)
Status	Mature
Customer type	Enterprise FMCG, F&B, Pharma, Biotech, Chem, CRO, CDMO, MedTech, Consumer
Customers	100+
Platform	N/A
Integrations	Requires Training or other learning management system

PRODUCT SHEET

Veeva LIMS

Veeva LIMS enables Quality Control to optimize batch release testing, stability study management, and environmental monitoring. It drives digital method execution, specification adherence, and review by exception to accelerate the release of product.

LIMS promotes compliance by verifying user qualifications from Veeva Training, displaying effective test method procedures from QualityDocs, and initiating lab investigations directly in QMS from out-of-specification (OOS) results.
