

CLOSING THE SKILLS GAP

As manufacturing industries gear up for expansion, the skills gap stands as a significant challenge. With rapid advancements in AI, automation, and digital technologies, businesses face the **urgent need to upskill their workforce to remain competitive.**

The Challenge

600,000

“The manufacturing industry is struggling with a massive labor shortage, with over 600,000 job openings nationwide.”

(Source: Quality Magazine)

Recent advancements in automation and digital technologies have contributed to manufacturing skills being obsolete, creating a mismatch between the skills in demand and those that possess those skills.

The Opportunity: Why Upskilling Matters

01

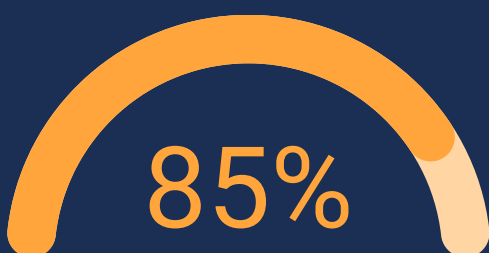

Organizations embracing **technology-enabled** upskilling build agile, dynamic workforces.

02

Innovative tools enable manufacturers to standardize and scale training programs.

03

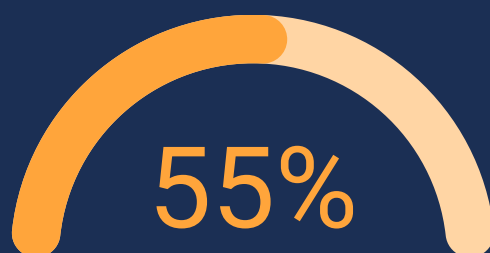

Bridging the skills gap drives industry progress, business success, and workforce resilience.

HUMAN ERRORS LEAD TO ISSUES

“85% of quality issues are caused by worker errors.”
