

Digitally Transform Health and Safety Management

A strong H&S culture engenders trust and engagement and delivers better business outcomes, but requires universal participation, commitment, and transparency. Veeva's powerful, flexible, user-friendly and intuitive digital H&S solutions empower the organization from the factory floor to the boardroom.

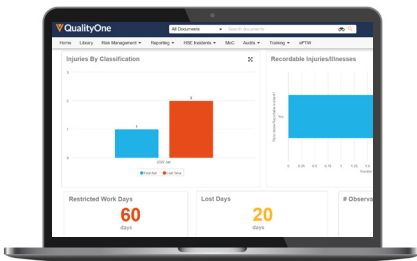

Create a Universal H&S Culture

- Report hazards, incidents and near-misses via desktop and mobile applications.
- Manage training, changes, audits, process hazard assessments (PHA), e-permit-to-work (ePTW) and other H&S actions digitally.
- Leverage digital workflows, automatic notifications, and investigation tools to identify root causes, assign corrective actions, implement changes and avoid reoccurrence.

Enable Holistic Risk Management

- Create a virtuous risk cycle by integrating data and insights from hazards, incidents, audits, investigations and other H&S events within a global risk register.
- Unify H&S risk with Quality risk and training in a single system of record and engagement.

Gather Real-Time Data and Insights

- Identify priorities and generate reports for real-time visibility into critical incident metrics with built-in dashboard and reports.
- Establish incident report templates based on standardized formats suitable for partners or regulatory bodies (e.g., OSHA forms).

Veeva's H&S Management Suite Provides a Unified Solution That Harmonizes Relevant Processes Across Quality and H&S

Mobile Reporting

Veeva H&S Management Suite Features

Incident Management [Available on Mobile App]

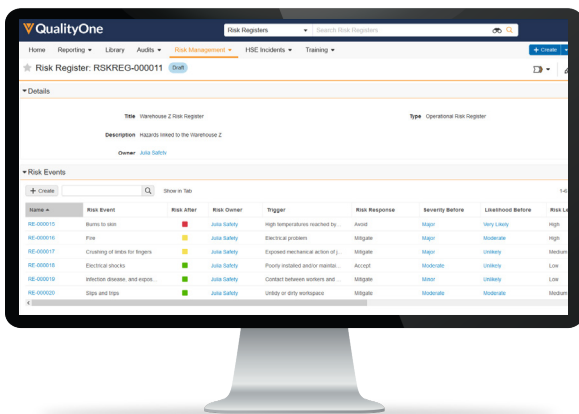

React quickly to events involving health and safety as well as environmental aspects of the organization. Ensure traceability of investigations and actions linked to hazards, near-misses, and incidents.

Management of Change

Control the request, assessment, planning, implementation, and closure of changes throughout the entire organization, ensuring compliance with all applicable procedures.

Risk Management

Manage a globally available, user-friendly tool to achieve a transparent, dynamic overview of internal and external operations risks. Work on each individual source of risk to proactively prevent H&S events. Leverage out-of-the-box risk assessment matrices, collaboration and workflow tools to support, engage and coordinate stakeholders.

Process Hazard Assessment (PHA)

Perform a detailed assessment of the potential hazards in your process using a step-by-step, collaborative, and transparent workflow.

Unified and Complete

One complete solution for managing H&S and quality processes, documents, and training. From incident reporting, audits, changes and risk assessment, to corrective and preventive actions, everything is unified and integrated in a single system of record.

About Veeva

Founded in 2007, Veeva NYSE (VEEV), is a global provider of industry-specific cloud software solutions that address the unique operating challenges and regulatory requirements of the consumer products and chemical industries. Our solutions help R&D, quality, regulatory and commercial teams eliminate inefficiencies and bring high-quality, safe, sustainable products to market without compromising compliance. Veeva is headquartered in the San Francisco Bay Area, with offices throughout North America, Europe, Asia, and Latin America. [Learn more.](#)

Document Control [Available on Mobile App]

Ensure each part of the organization accesses and uses the right documents at the right time for the right purpose to increase efficiency and reduce incidents. The built-in integration to Office 365 allows users to collaboratively author, review, approve, and release documents without handling duplicate files. Everyone works from one single source of truth, whilst full audit trails provide transparency.

Training

Manage training needs by centralizing content management and delivery on the same modern, user-friendly platform. Improve H&S performance by proactively allocating training plans, managing training materials and monitoring compliance.

Multi-Device Accessibility

Access QualityOne H&S Management Suite securely from any device, anywhere. Conveniently pull up documents, complete tasks or fill out forms while away from your computer.

Configurable Reports and Dashboards

Improve management oversight to stay ahead. Pre-defined and custom reports and dashboards track and trend your H&S and quality data. Easily share information with internal and external stakeholders.

Audit Management [Available on Mobile App]

Execute a comprehensive audit program across the organization that runs on time. Automate and digitize administrative tasks and focus on findings, investigations and CAPAs via unified audit, risk and management of change tools. Quickly and easily retrieve historical records and avoid recurrent findings in future audits.
