

Digitally Transform Your RMQ Process

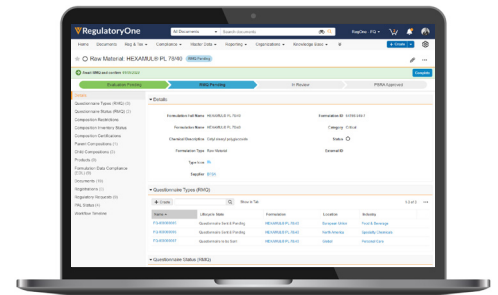

Veeva RegulatoryOne Formulation Questionnaires automates and accelerates the collection of supplier raw material data and documents within a transparent, regulatory system of record that simplifies the process for you and your supplier partners.

The Challenge

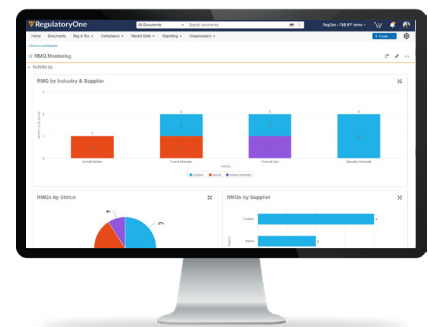

Requesting information from suppliers is onerous, reactive and typically causes approval delays of 4-6 weeks. For the requester, the process of sending, reminding, evaluating and approving responses is disjointed and manual relying on email and forms that trap data. For the respondent, one-size-fits-all forms from customers result in time spent providing responses to previously known data or questions irrelevant to the use-case.

The Solution

RegulatoryOne Formulation Questionnaires is a purpose-built solution that digitizes and automates the questionnaire process, ensuring the timely, efficient and secure collection of critical data from suppliers.

A complete overview of your entire RMQ process internally and externally.

Real-time metrics to track and identify missing, overdue or outdated questionnaires.

Make Supplier Compliance Your Competitive Advantage

Instantly generate questionnaires from parameter-driven templates based on prepopulated data such as location or usage.

Automatically send requests and reminders to supplier contacts, who can on their own directly enter raw material data through a secure access link that does not require a user ID or log-in.

Accelerate approvals with efficient process that locks supplier submissions into a transparent and easily accessible record.

Improve collaboration by allowing supplier contacts to work together on responses.

Quickly identify missing, outdated, and expiring questionnaires through a real-time dashboard enabling pro-active assessment of the RMQ process at large.

RegulatoryOne Formulation Questionnaires Features

Formulation Questionnaire Templates

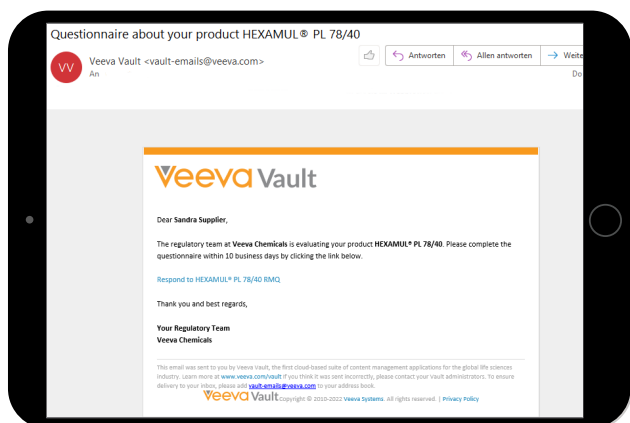

Leverage or modify out-of-the-box templates or create your own custom-made templates by geography, market, industry, use case, etc. Out-of-the-box templates include sections and questions for certifications, chemical inventory status, restrictions, origin and regulation.

Questionnaire Transparency

Create a historical record for questionnaires across all formulas and raw materials and within each formula or raw material. Leverage the full RegulatoryOne suite to connect RMQs to compositions, compliance assessments, registrations, certifications, and other regulatory data.

Questionnaire Security

Supplier contacts can only access questionnaires through secure links. Once submitted the supplier data is locked as permanent, supplier records that cannot be altered by either party.

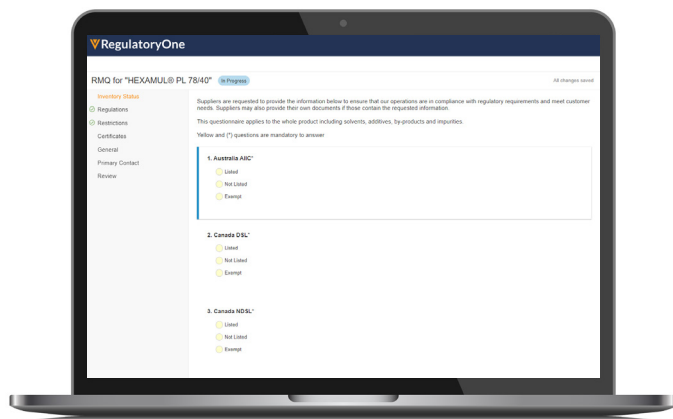

Atomic Security for Total Access Control

Atomic Security allows your Vault administrators to easily control access, visibility, and permissions to make sure that only the right people do the right things at the right time, without compromising data integrity or history.

About Veeva

Founded in 2007, Veeva NYSE (VEEV), is a global provider of industry-specific cloud software solutions that address the unique operating challenges and regulatory requirements of the consumer products and chemical industries. Our solutions help R&D, quality, regulatory and commercial teams eliminate inefficiencies and bring high-quality, safe, sustainable products to market without compromising compliance. Veeva is headquartered in the San Francisco Bay Area, with offices throughout North America, Europe, Asia, and Latin America. [Learn more.](#)

Real-time Data and Metrics

Track performance for suppliers and approvals e.g. using KPI's for number of questionnaires completed, closure rate, volume, missing and out-of-date questionnaires.

Modern Document Control

Manage documents using powerful collaboration and authoring tools like templates, Microsoft Office integration, review, and approval workflows. Find content easily.

Full Product Hierarchy

Place your RMQs and all other regulatory content in true product context by leveraging the product hierarchy that transparently and seamlessly connects your products, formulations, ingredients and substances.

Comprehensive Security

Veeva protects customer data with world-class physical, network, application, and data-level security. All communications to Vault and stored content are encrypted. By maintaining an ISO 27001 certified comprehensive security system, we ensure the confidentiality, integrity, and availability of our customers' data.
